

## ANNUAL CONFERENCE

**14-15 MARCH 2019**  
(PRE-CONFERENCE ON 13 MARCH)

COMO, ITALY

**MAKING THE EUROPEAN LEVEL 5 AREA A REALITY**

### The Programme & Practical Issues

#### ➤ Introduction

In about three months there will be the Annual Conference of CHAIN5, in the Italian Como. By now, quite a few people have already registered, also with contributions to the program from various countries and perspectives. It promises to be an interesting example of how CHAIN5 can act as a 'European Community of Practice' for all types of qualifications of the European Level 5 Area. The learning pathways that make use of one or more qualifications at level 5 of the EQF (or the comparable national level) can become more and more flexible in this way, and that will be extremely important in this time in which lifelong learning is getting higher and higher on the agenda. In this issue we provide information about:

- The sessions during the conference when it comes to the format
- The program as it looks at this moment
- Practical information
- The invoices
- How you can register, if you still want to do that, and schedule it. Welcome!

#### ➤ Sessions

On the basis of the proposals that were made for taking care of a workshop, a session in a small group or a contribution in another form, a small work group within CHAIN5 went to work to fit them into the program. The idea is to be as practical as possible, in an interactive way. In addition, during a session information about a particular theme or development can be given, leading to discussions and sharing experiences that may also be useful in other situations and countries.

Subsequently, aspects of the theme that lend themselves to setting up a working group under the umbrella of CHAIN5 will be examined, so that our members can be of service in the near future with further activities.

In the last week of February, the themes and developments that will be given a place in Como in the program will be announced. The format for the sessions in which they will be discussed will also be explained. That means that on that basis the participants can make their choices.
