Windesheim Flevoland

Almere
8th city in the Netherlands,
200.000 inhabitants
First houses build in 1976.

Almere

*Is the youngest city in the Netherlands:
First houses build in 1976.*

Delivery of the first key, 1976

October 3; 2016
200.000 inhabitants

Themes for this conference

- a) Creating flexible professional development for level 5 programmes*
- b) Supporting successful progression at all levels**
- c) Successful Employer Engagement**
- d) Cooperating with your suppliers of talent*
- e) Opening doors to increase quality**

Comakerships[®]; a concept for Internships

What does an intern do during his studytime outside school??

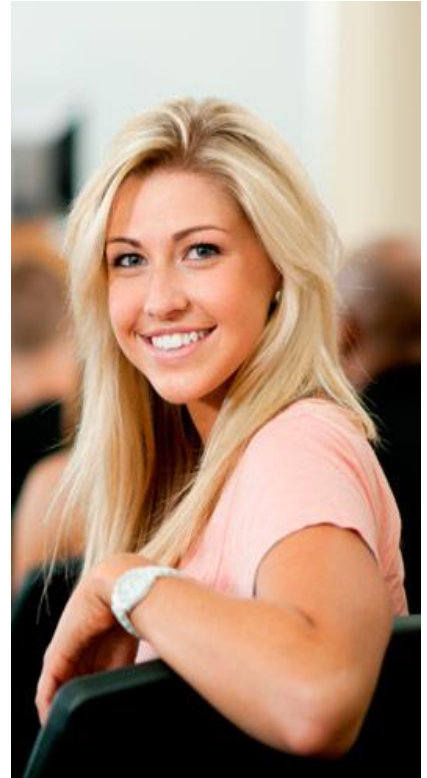

The story of Maud:

Maud is a 21 year old student at Windesheim Flevoland. She is studying *Officemanagement* and she is in her second and last year now.

She is hoping to graduate in July this year.

During her study, she fulfilled at least 2 *Comakerships*®.

A Comakership is an intensive, real life way of practical learning. The concept is developed by Windesheim Flevoland in collaboration with its partners.

Comakership[®]

Characteristics:

1. Duration: at least 10 weeks
2. Real life situations / Unique projects
3. Based on a three-party agreement
4. Project-based approach
5. Students work on site, on location, 3 – 4 days on location, 1 day at school
6. Number of students 1 to 5 (based on complexity of the assignment)

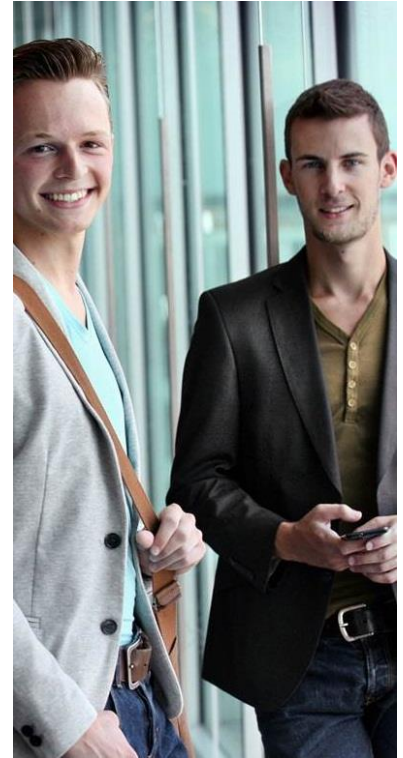

casus

Problem: elderly people have a great risk in falling and breaking bones. It happens that elderly people fall and lay for a long time in eg. the bathroom before they are found.

Solution: develop a device that detects when people fall and that device alerts the nurse or family.

New problem: The developed device is so horrible that elderly people refuse to wear the device.

Challenge: develop a falling device that elderly people are willing to wear, make it look like jewelery.

The 'old' device

The 'new' device

Comakership falling device

A projectgroup of level 5 and level 6 students are working on developing the device:

Design students (level 6)

Engineering students (level 6)

Softwaredevelopment students (level 5)

Are working together to develop a device.

Comakership: The learning triangle

Comakership: Transfer of Knowledge

An example

This is **Samantha Voorneveld**, bachelor student Marketing.

Her assignment during her comakership was to find out what the amount of bars, cafés and restaurants was that uses an automated, online draughtsystem.

A relatively easy assignment.

20% uses this automated system, 80% not.

During her comakership she changed her assignment and she developed a financing system for bars, cafes and restaurants to buy such a system.

This financing system is now nationwide implemented.

Establishing relations

At this moment we have more than 150 organisations, companies and agencies in our portfolio.

<https://matchpoint.windesheim.nl/Pages/Matchpoint-Home.aspx>

Establishing relations: *Flevopenningengala*

During an annual event (The Flevopenningengala) an award is granted for the best Comakership of the year

The gala is organized by the province to laureate outstanding achievements in the province.
