

**ON OUR WAY TO ANOTHER CHALLENGING AND INTERESTING
YEAR FOR OUR COMMUNITY OF PRACTICE**

ANNUAL CONFERENCE

A COMMUNITY ON THE MOVE... FOR YOU

MARCH 12-13, 2019
(SOCIAL PROGRAMME ON MARCH 11)

TALLINN, ESTONIA
Tallinna Majanduskool

Short update

In this newsletter, at the end of 2019, we will provide a short update regarding the annual conference in Tallinn, Estonia, next March. The objective is to make those days of this conference, with an interesting program on Wednesday, as practical as possible when it comes to the issues that play a role at level 5 - internationally and nationally.

Workshops and sessions

There will be all kinds of workshops and sessions on various topics. and themes. You can also contribute to this:

Make a **proposal for a workshop** about what concerns you and/or your organization or institution about level 5, and what can be **inspiring** for the work of your international colleagues... share your **experiences**... (see page 5)

Topics at the national level; input for discussions

In recent years there has been a strong growth in the number of people and organizations that have become members of CHAIN5. This shows that level 5 is an important topic, talking about

educational developments around levels 4, 5 and higher. Designing flexible learning paths in all kinds of ways has also become crucial, given the importance of lifelong learning. Among other things, it means that we see that there are more and more countries with members from all kinds of organizations, institutions and networks. That is a clear signal when it comes to the position of level 5 in a national context. It also means that there is a need to learn from other countries, to consult with each other about what is going on and to discuss matters that can be used in daily practice.

That is why we are planning at the end of Thursday morning – after the meeting of the Executive Committee (also open for other members of CHAIN5 – a round of sessions in Tallinn to sit together with participants from the same country or from countries in certain regions in Europe. The most interesting themes that play a national or regional role can be considered together, with the expectation that it will be possible to learn from other countries.

The results will be presented in the plenary session later that day so that there is an opportunity to learn about international themes.

It can also be viewed whether further activities can be linked to it. One possibility is that together from a certain country it is decided to organize a study trip to another country, with the help of the members of CHAIN5 there. Of course we can also make a contribution from CHAIN5, in terms of content or at the organization. More about this in Tallinn.

Recommendations Malta Conference

At the end of the conference in Malta the participants put a number of recommendations on paper on issues such as:

- What makes level 5 so specific, so what are the characteristics of the level 5 identity?
- What is the best way to give a further shape of the process around VPE (Vocational-Professional Education, VET at higher levels)?
- Which themes around level 5 deserve more attention in view of the whole tertiary education model.

A document with these recommendations and conclusions will be published in January. It will also indicate which subjects are relevant for further activities within CHAIN5. For the practical matters we assume that they will either be discussed in the workshops or given a place in the sessions.

An alternative approach will be taken to the options available for the proposed model for all tertiary education (of which the European Level 5 Area is a part), together with EfvET (www.efvet.eu) and possibly other international networks and associations. This will be reported separately.

How to register for the annual conference

If you are interested in participating in the Annual Conference, you can now register for this event. You can send an e-mail to tallinn@chain5.net with the following information:

- Name
- Organisation
- Position
- E-mail address
- Participation in the social programme (11 March): yes / no
- Dinner on Wednesday: yes / no
- Dinner on Thursday: yes / no
- And indicate if you have special dietary requirements.

The invoice will be send to you at the end of January 2020. You can cancel your registration till the 15th of February, without costs. After this date you have to pay 50% of the invoice.

General theme

The general theme of the conference will be to discuss the state of affairs concerning the ‘European Level 5 Area’ and how CHAIN5 can play a role in this. This means that we must identify the (new) aspects on which we can take the lead, knowing that our members - in countries in which we are

represented - can do their work better 'at level 5'. We want to do this as practically as possible, supported by a collaboration between experts, managers, policy makers and others involved in level 5.

Practicalities

Call for workshops

As the program shows, there is room for a number of workshops on the afternoon of Thursday.

If you (or a group) want to take care for a workshop... send an e-mail to tallinn@chain5.net with your proposal, with your theme, the relevance for level 5, the expertise that you have, your ideas for inspiring your colleagues...

We will take a look at the proposal and then we will come back to you. Perhaps with some questions, a request for clarification or suggestions for the way to handle the theme – having our community in mind.

Thursday 12 March

14:30 – 16:50 Workshops – thematic groups – good practices – new ideas...
 14:30 – 15:35 (first round)
 15:45 – 16:50 (second round)

Estonian themes

As we have done in Como, we will give the floor to our host. There will be some workshops offered by Estonian delegates. A lot of things will happen in Estonia in the next decade, and level 5 is part of the process that will take place... having effect on all sectors.

New themes

Other workshops by the members can be about new themes... so, look at your work, institution and expertise... and make a proposal...

- What makes your theme a good example?
- What is important for a level 5 qualification, looking at the way a program can be offered in the national context – knowing that it can also be in the interest of other members, organisations and countries...
- What is playing when it comes to using the theme in the design of level 5 programs and qualifications...
- What makes it a good practice for other countries and institutions...
- Why does this theme lend itself to be used in an international community such as CHAIN5, so why can we learn from each other and how to deal with this theme...
- How people think they can continue with discussions about the theme, with input from which people and organizations, and what a good form of cooperation is...
- Which other parties outside the education sector can play a role in this (and can therefore be approached via CHAIN5)...

In short, and in view of the above, it should be a theme connected to the level 5 area, internationally recognizable and based on experience gained and existing expertise that can be used for a thematic group. But feel free to start your own discussion... showing what is happening... and what can be interesting for the future...
