

New application

ERASMUS+

New attempt...

- We failed in 2014
- Too much focus on 'building a network
- To been as support/back-up for CHAIN₅
- And... not the right experts... or....

Strategic Partnership (KA-2)

- Cross-sectoral
 - VET and HPE
 - Management+
 - Partners+
 - Themes+
 - Networking+
 - Intellectual Outputs
-
- More focus on exploitation and dissemination and quality assurance (learning from other projects)

Focus on...

- Implementation of level 5 of the EQF
- Combining EQF and EHEA
- Permeability between VET and HE
- Preventing drop-outs in HE
- Employability
- Using the 'same' instruments (ECVET / ECTS...)
- Non-formal qualifications and level 5
- Work-based learning / dual education at level 5

New approach

- Not looking for possible, interesting and relevant themes – for a network for level 5 (like CHAIN5)
- Not the focus on building a community of practice...
- But: Let us take some relevant themes
- Looking for partners for every theme (a partner is covering two themes) – important for the country, region or network of the partner
- One of the partners for a theme has expertise and experience on that one – to help the other partner and to combine them with other themes (and partners)...

Discussion

- What are good and relevant themes for the project?
- Why? Reasons for having this in a project?
- Sources? Where can information be found about such a theme?
