Mind the gap!

```
class Simple{
    public static void main(String args[]){
     System.out.println("Mind the gap!");
    }
}
```

~50%

of Norwegian businesses lack
critical competencies in
information and communication technology

Digital transformation defines our future development

Digital transformation changes education in two fundamental ways

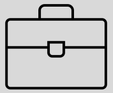
What we teach

New technologies create demand for **relevant** and updated study programs, driven by the requirements from industry, existing workforce and future job seekers

How we teach

Digitalization brings new opportunities to enhance the **learning experience** and provide **flexibility** to students in all phases of life – ensuring lifelong learning opportunities for all

How we respond:



Employability

Our programs are developed with industry needs in mind, preparing students for the future

Student Experience

We cater to people in all walks of life, providing our students with motivating teachers, digital tools and a supportive learning community

We currently deliver courses within seven domains, directed at the societal skills-gap in tech

Portfolio

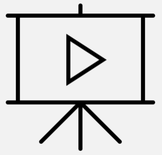
Cyber Security

Data & AI

Games & Animation

Digital Design

Software Development



Sound and Film Production

Tech. Management

Product & Tech

Learning Experience (LX)
Content Factory
& IT Infrastructure

Pure digital

We think digital into everything we do – we build *all* new digital experiences

LX first

Our deep understanding of learning frameworks differentiates us

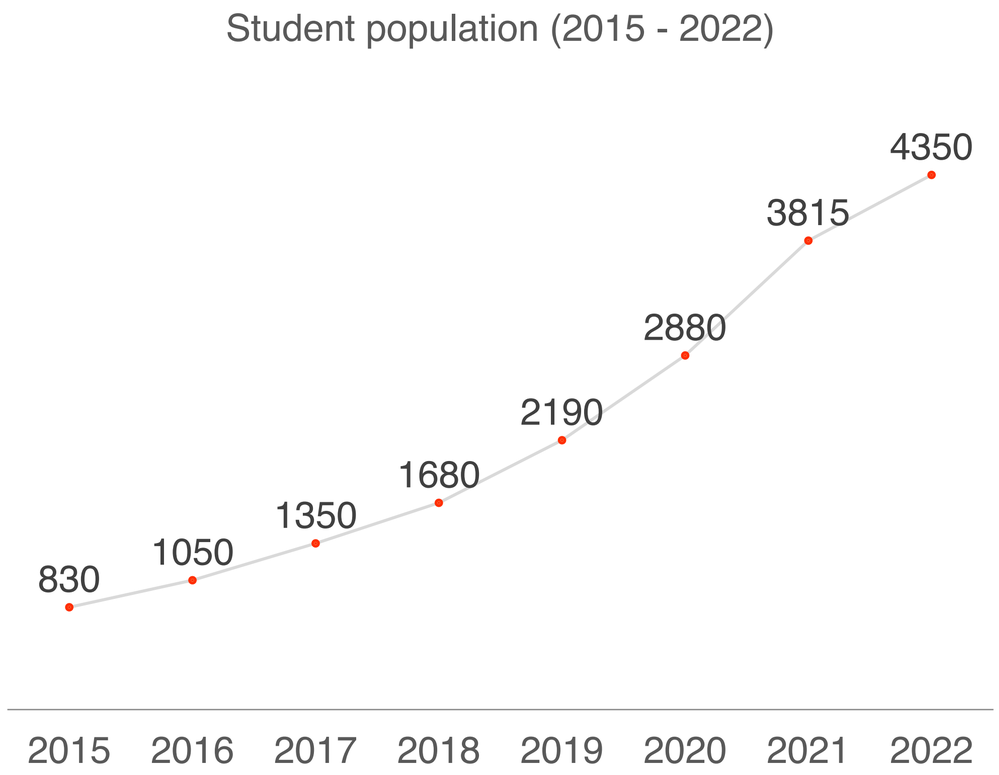
Build, measure and learn

We validate our ideas early through pilots, MVPs and deep customer involvement

Scalability and modularity

Our learning products and digital solutions are built with growth in mind. Controlled – *yet ambitious* - scaling is our target.

We give thousands of students employable education



We continue to deliver accessible education to everyone
